

## YOUTH AND POLITICS CLUB

Youth in politics was created to help SUA students stay current with social, national, and international events and issues. We have registered students to vote, held political forums, had field trips to see politicians, and provided students with great political events. Most of all, our goal is to inspire young people to believe that our generation has the power to shape the future of our society.

### 2010 Spring Semester Goal(s)

1. To get more members.
2. To spread the YIP concept of the importance of youth within the nature of politics, voting, knowledge of current legislative issues, etc., so that it reaches more students.
