

### Global Brigades Club

We intend to provide a way and opportunity for students to explore sustainable development and to receive first-hand experience concerning matters of sustainable development in Latin American countries. This year, we are learning about environmental issues in Panama and fundraising to participate in volunteering program in the country. We also intend to promote awareness of environmental issues in Latin American countries among students and the surrounding community members.

### Our Goals for Academic Year 2011-2012

- 1) To develop an awareness of global issues through club activities.
- 2) To learn about environmental issues in Latin American countries.
- 3) To contribute to developing countries through volunteering abroad.
- 4) To interact with other communities inside/outside of SUA.
